#### Introduction:: Kuwait

## Background:

Britain oversaw foreign relations and defense for the ruling Kuwaiti AL-SABAH dynasty from 1899 until independence in 1961. Kuwait was attacked and overrun by Iraq on 2 August 1990. Following several weeks of aerial bombardment, a US-led, UN coalition began a ground assault on 23 February 1991 that liberated Kuwait in four days. Kuwait spent more than \$5 billion to repair oil infrastructure damaged during 1990-91. The AL-SABAH family has ruled since returning to power in 1991 and reestablished an elected legislature that in recent years has become increasingly assertive. The country witnessed the historic election in 2009 of four women to its National Assembly. Amid the 2010-11 uprisings and protests across the Arab world, stateless Arabs, known as bidun, staged small protests in February and March 2011 demanding citizenship, jobs, and other benefits available to Kuwaiti nationals. Youth activist groups - supported by opposition legislators - rallied repeatedly in 2011 for the prime minister's dismissal amid allegations of widespread government corruption. Demonstrators forced the prime minister to resign in late 2011. In late 2012, Kuwait witnessed unprecedented protests in response to the Amir's changes to the electoral law by decree reducing the number of votes per person from four to one. The opposition, led by a coalition of Sunni Islamists, tribalists, some liberals, and myriad youth groups, largely boycotted legislative elections in 2012 and 2013 ushering in legislatures more amenable to the government's agenda. Since 2006, the Amir has dissolved the National Assembly on five occasions (the Constitutional Court annulled the Assembly in June 2012 and again in June 2013) and shuffled the cabinet over a dozen times, usually citing political stagnation and gridlock between the legislature and the government.

## Economy:: Kuwait

## Economy - overview:

Kuwait has a geographically small, but wealthy, relatively open economy with crude oil reserves of about 102 billion barrels - more than 6% of world reserves. Petroleum accounts for nearly half of GDP, 95% of export revenues, and 95% of government income. Kuwaiti officials have committed to increasing oil production to 4 million barrels per day by 2020. Budget surpluses have stayed around 30% of GDP, which has led to higher budget expenditures, particularly wage hikes for many public sector employees, as well as increased allotments to Kuwait's Future Generations Fund. Kuwait has done little to diversify its economy, in part, because of this positive fiscal situation, and, in part, due to the poor business climate and the historically acrimonious relationship between the National Assembly and the executive branch, which has stymied most movement on economic reforms. In 2010, Kuwait passed an economic development plan that pledges to spend up to \$130 billion over five years to diversify the economy away from oil, attract more investment, and boost private sector participation in the economy, though much of these funds have yet to be allocated.

# Transnational Issues:: Kuwait

## **Disputes - international:**

Kuwait and Saudi Arabia continue negotiating a joint maritime boundary with Iran; no maritime boundary exists with Iraq in the Persian Gulf

# Refugees and internally displaced persons:

stateless persons: 93,000 (2012); note - Kuwait's 1959 Nationality Law defined citizens as persons who settled in the country before 1920 and who had maintained normal residence since then; one-third of the population, descendants of Bedouin tribes, missed the window of opportunity to register for nationality rights after Kuwait became independent in 1961 and were classified as bidun (meaning without); since the 1980s Kuwait's bidun have progressively lost their rights, including opportunities for employment and education, amid official claims that they are nationals of other countries who have destroyed their identification documents in hopes of gaining Kuwaiti citizenship; Kuwaiti authorities have delayed processing citizenship applications and labeled biduns as "illegal residents," denying them access to civil documentation, such as birth and marriage certificates; 2011 bidun demonstrations for the recognition of their Kuwaiti nationality led to several arrests

# Trafficking in persons:

current situation: Kuwait is a destination country for men and women subjected to forced labor and, to a lesser degree, forced prostitution; men and women migrate from India, Egypt, Bangladesh, Syria, Pakistan, the Philippines, Sri Lanka, Indonesia, Nepal, Iran, Jordan, Ethiopia, and Iraq to work in Kuwait, most of them in the domestic service, construction, and sanitation sectors; although most of these migrants enter Kuwait voluntarily, upon arrival some are subjected to conditions of forced labor by their sponsors and labor agents, including nonpayment of wages, long working hours without rest, deprivation of food, threats, physical or sexual abuse, and restrictions on movement, such as the withholding of passports or confinement to the workplace

tier rating: Tier 3 - Kuwait does not fully comply with the minimum standards for the elimination of trafficking and is not making sufficient efforts to do so; the government enacted comprehensive anti-trafficking legislation in 2013 but did not report any arrests, prosecutions, convictions, or sentences of traffickers for either forced labor or sex trafficking in the last year; Kuwait's victim protection measures remain weak, particularly due to its lack of proactive victim identification procedures and continued reliance on the sponsorship system, which causes victims of trafficking to be punished for immigration violations rather than protected (2013)
